

I feel it is an extremely bad idea to minimize the ownership of TV and radio stations and put it in a very few hands. Our country is full of capitalists who would love to control the media. The airwaves are already a disaster after the removal of the "Fairness Doctrine", and would only get worse if only a few owners exist. Leadership should stop and consider the ultimate consequences of this action, and think how this will affect future generations and their thinking of the perpetrators of this type of action. DONT'T DO IT!
